

Tempo Plugin is designed and developed to be intuitive for all users - from staff to executives - the combination of Tempo and JIRA stream- lines the management of work hours, tasks, and periods, enabling a seamless workflow and eliminating the duplication of entry.

Log Time and Expenditures

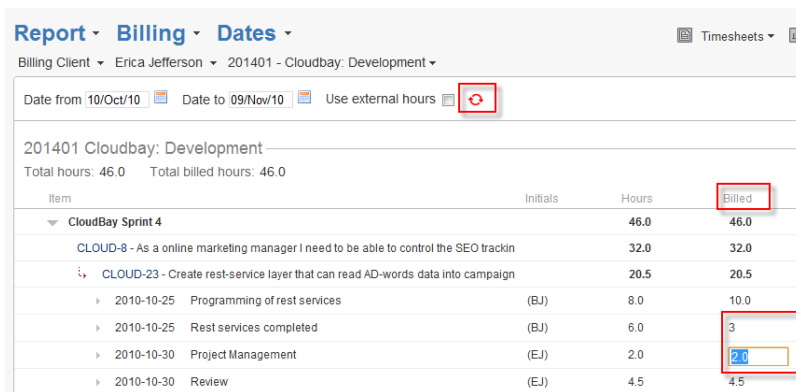

Tempo will streamline the process of managing work and expenses, whether or not profits are at the center of your objectives. If your organization is serious about agile business, it's time to take a closer look at Tempo.

- Log hours by day, week, or month directly on the timesheet
- Enter time either in a direct view or in a timesheet
- Quickly add time to an internal issue such as vacation time
- Search for previous worklogs with Tempo's worklog search
- Adjust worklogs and custom attributes
- Managers can overwrite hours by staff

Manage Time and Expenditures

When it comes to cost or expenditures, you want to make sure that time-sheets will be approved by your clients and managers. Tempo allows you to easily correct timesheets in live reporting view. This view was designed to optimize the overall process of correcting and approving time-sheets.

- Split or move hours from one worklog to another JIRA issue
- Adjust billing settings for issues
- Quickly modify and correct worklog descriptions
- Add and modify billing attributes
- Print and review billing reports
- Approve billing reports and user time sheets
- Adjust billable time vs worked time

SKG S.A.

"Before implementation of Jira bundled with Tempo Plugin and GreenHoper plugin, SKG personnel had to use four different systems for issue management, agile development planning and management and time tracking. Now all that areas are covered by one application and all data kept in one database."

Jarek Glowka President of SKG S.A.

Tempo Plugin is designed and developed to be intuitive for all users - from staff to executives - the combination of Tempo and JIRA stream- lines the management of work hours, tasks, and periods, enabling a seamless workflow and eliminating the duplication of entry.

Getting Overview

Tempo has been designed to allow project managers, executives and employees with fast and informative snapshots of data. Perfect for tracking progress and collaborating on tasks, Tempo provides superior visual indicators for a wide variety of metrics, and can change the way you analyze your business.

	Project Ratio	Hours	S
Bob Johnson - 5 issues ▶	87.2%	54.5	
Erica Jefferson - 2 issues ▶	100%	11	
Daily hours total:		65.5	
Weekly hours total:		65.5	

- Employees can quickly check their daily, weekly, and monthly hour allotments
- Managers can view their employees' timesheets and performance
- Project Managers can visualize client workload for a given billing period
- Managers can view employees' worklogs by issue and period
- Clear workflow status indications for all users

Connecting to Your Business

View your list of employees in JIRA, import customer account information, and enjoy easy access to your business vital operations. Tempo's bi-directional API lets you share data with your billing or reporting system. You can configure Tempo to support your billing or salary or budget cycle, or create a holiday schedule.

Customer Account Management

Set and modify customer account relationship and status.
All changes will be saved automatically.

int Project

Billing Id	Billing Name	Status
24000000	Acme - Education	Open <input type="button" value="▼"/>
24000060	Acme - Staff Sick Time	Open
24000062	Acme - IQT Development	Open
24000064	Acme - Staff Vacation	Open

- Import your existing customer accounts into Tempo
- Enrich worklog information with custom data and attributes
- Define non-working days schedule for your organization
- Define periods
- Define custom worklog attributes for reporting on billing or expenditures
- Use the Tempo API to sync with your billing system

"The Tempo team has the claim to build the very best JIRA plugin. And I must admit they really do. Tempo is the best extension for JIRA if you want to integrate time tracking and accounting into JIRA. We looked several years for something similar and even considered building it by our own as we really missed these features in JIRA.."

Alexander Grzesik Chief Software Architect Noema Life
